DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

On line 32 of Claim 1 on page 21 of the claims, a "}" (closed bracket) has been added at the end of the equation for "Q".

On line 15 of Claim 2 on page 22 of the claims, a "}" (closed bracket) has been added at the end of the equation for "B".

On line 7 of Claim 3 on page 23 of the claims, the "," (comma) at the end of the claim has been deleted and a "." (period) has been added in its place.

On line 22 of Claim 4 on page 23 of the claims, the "," (comma) at the end of the claim has been deleted and a "." (period) has been added in its place.

Allowable Subject Matter

2. Claims 1-4 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claim 1 is allowed since none of the prior art of record discloses or renders obvious of determining a jitter component using the claimed equations. The closest prior art of record, Brueckheimer et al. (U.S. Publication 2002/0087370 A1), discloses setting up a network, in part based on jitter consideration; however Brueckheimer et al. fails to disclose using the claimed equations.

Claims 2-4 are allowed since they depend on allowable claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fichou et al. (U.S. Pat. 6765873) discloses optimizing a network to compensate for jitter delays. LaFollette et al. (U.S. Pat. 6212171) discloses using jitter calculations to optimize a network. Brueckheimer et al. (U.S. Publication 2002/0087370 A1) discloses a method for planning the layout of a network based in part on jitter. Smith et al. (U.S. Pat. 6862298) discloses a method of monitoring jitter and

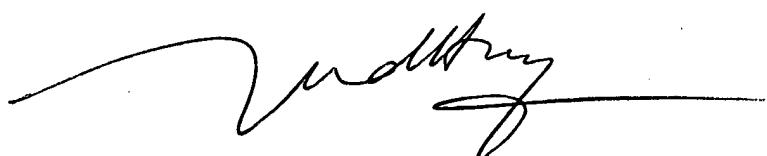

controlling a buffer to diminish the effects of jitter. Borella et al. (U.S. Pat. 6442141) discloses a network delay and loss simulator.
